Waste disposal in the City of Emmerich am Rhein

Waste disposal (collection and transport) is a municipal duty. The public utilities of the City of Emmerich am Rhein (KBE) operate and organize the public waste disposal system on behalf of the City of Emmerich am Rhein within the city boundaries.

The household waste such as paper, glass, metal, plastic, composite packaging, organic waste and residual waste must be collected separately. The disposal company will provide appropriate collection bins.

To be able to implement the disposal system, the urban area has been divided into disposal districts. The street-based division of the districts can be found in the list of streets at the end of this calendar.

Schönmackers is the company we have commissioned with waste collection and transport: 0800/1 74 74 74 (free of charge)

The bulky and green waste disposal site at Blackweg 40 is operated by KBE.

Tel. 02822/92 56 50

The disposal or respectively the recycling of the waste is carried out by the district Kleve or its association for waste management called Kreis Kleve- Abfallwirtschaftsgesellschaft mbH.

Tel. 02825/90 34 20

Waste disposal charges are levied by way of the property tax assessment of the City of Emmerich am Rhein that is prepared at the beginning of each year.

This is also where waste containers are administered, ordered and cancelled.

Tel. 02822/7512-31 or -27

There is a basic fee per person for the provision of the grey residual waste bin and the green/blue paper bin. A basic container fee is charged for the brown organic waste bin.

In addition, there is a weight charge per kilogram of residual waste and organic waste.

The bins are equipped with a chip that allows each bin to be allocated to a specific property. The bins are first weighed after being attached to the bin lorry and then again the bin has been emptied. The weight difference is allocated to the respective property.

Yellow bins or yellow sacks are provided for the collection of plastic and metal packaging.

Bottle glass and other packaging made of glass are collected in green glass baskets at each property and separated according to white, amber and green glass.
